### **Asbestos Notification**

All asbestos has been abated and contained as outlined by the AHERA plan. A written Asbestos Management Plan documents inspection and surveillance activities, known and presumed asbestos-containing materials, records of asbestos-related building material disturbances and response activities, and post-response documentation. The Plan is located in the main office and is available for review by parents, legal guardians, teachers, and other school personnel, representatives of the EPA, representatives of the State, and the public. For more information, call Darci Lynch at 989-414-0383,
