IMMUNIZATION

Reference:

MCL 333.9201 et seq., 380.1177, 380.1177a
AC 325.176

The Board believes immunization is one of the most cost-effective measures to protect children from vaccine-preventable diseases. Accordingly, the Board requires that all students be properly immunized at the time of registration or not later than the first day of school pursuant to the provisions of the Department of Health and Human Services ("DHHS") regulations.

Students must meet the immunization requirements set by the State for attendance at school in order to enroll or attend.

However, students who do not meet the immunization requirements shall be admitted in accordance with Administrative Guidelines. Transfer students shall not be admitted without proof of immunization as required by the State.

There are three (3) circumstances in which a required vaccine may be waived or delayed:

- A. A valid medical contraindication exists to receiving the vaccine. The child's physician must certify the contraindication, the vaccines involved, and the time frame the student is not able to get the vaccines, on the appropriate form.
- B. The parent(s)/guardian(s) hold religious or philosophical beliefs against receiving a vaccination. Any parent or guardian who wants to claim a nonmedical waiver must receive education regarding the benefits of vaccination and the risks of disease from a county health department before obtaining the certified nonmedical waiver form through the Local Health Department, and present same to the appropriate Academy personnel.
- C. The child has received at least one (1) dose of each immunizing agent and the next dose(s) are not due yet. The Academy must follow up with the parent or legal guardian to ensure the student has received the required follow-up dose(s) of the vaccine.

When the Academy provides information on immunizations, infectious disease, medications, or other school health issues to parents and guardians of pupils in at least grades 6, 9, and 12, then with that information the Board is required to include information about meningococcal meningitis and the vaccine for meningococcal meningitis as well as about the human papillomavirus and the vaccine for human papillomavirus. The information shall include at least the causes and symptoms of meningococcal meningitis, how it is spread, and the risks associated with human papillomavirus. In addition, the information shall include sources where parents and guardians may obtain additional information about both diseases and where they may obtain the associated vaccinations.

The Educational Service Provider shall develop Administrative Guidelines to ensure the proper implementation of this policy.
